

Modeling risk-benefit in a food chain: nutritional benefit *versus* microbial spoilage risk in canned green beans

Clémence RIGAUX,
Catherine Renard, Stéphane André,
Christophe Nguyen-the, Isabelle Albert,
Frédéric Carlin

Simultaneous evolution of risk and benefice in the food chain: a scenario example

Risk: *G.Stearothermophilus*
concentration (\log_{10} cfu/g)

Benefice: Vitamin C
concentration (mg/kg)
